

产品名称: Necrosulfonamide
产品别名: (E)-Necrosulfonamide

生物活性:																										
Description	(E)-Necrosulfonamide is a necroptosis inhibitor acting by selectively targeting the mixed lineage kinase domain-like protein (MLKL) to block the necosome formation.																									
In Vitro	(E)-Necrosulfonamide (0.5-2.5 μ M; 20 hours) reduced TRAIL (50 ng/mL) and STS (1 μ M) -induced necroptosis in a concentration-dependent manner[3].
