产品名称: S0859

产品别名: S0859

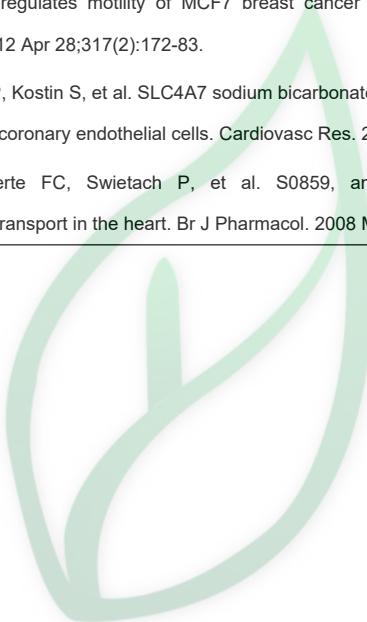

生物活性:

Description	S0859 is a selective, high-affinity generic NBC inhibitor. S0859 reversibly inhibits NBC-mediated intracellular pH (pHi) recovery ($K_i=1.7 \mu M$, full inhibition at approximately $30 \mu M$).																								
IC₅₀ & Target	NBC[1]																								
In Vitro	Treatment with NBC inhibitor S0859 significantly increased caspase-3 activity and elevated the number of apoptotic EC. S0859 is potentially important for probing the transporter's functional role in heart and other tissues[1].																								
	In Vitro: DMSO : $\geq 100 \text{ mg/mL}$ (188.67 mM) * " \geq " means soluble, but saturation unknown.
