产品名称: HA 130

产品别名: HA 130

生物活性:

Description	HA130 is a selective autotaxin (ATX) inhibitor with an IC ₅₀ of 28 nM.																												
IC ₅₀ & Target	Autotaxin 28 nM (IC ₅₀)																												
In Vitro	HA130 completely blocks the ability of ATX to promote TEM (transendothelial migration). HA130 at 0.3 μM completely ablates the activity of ATX on TK1 uropod formation[1].																												
In Vivo	HA130 slows T cell migration across lymph node HEVs. HA130 decreases the "outside HEVs/inside HEVs" ratio by 3-4-fold compared to vehicle-treated animals vehicle[1]. The s.c. administration of HA130 induces marked lymphocyte accumulation within the endothelial cell (EC) and sub-EC layers of HEVs in draining lymph nodes (LN)s[2].
