产品名称: 3-[(2,7-Dimethoxy-9-acridinyl)thio]-1-propanamine Hydrochloride
产品别名: LDN-192960

生物活性:

Description	LDN-192960 is an inhibitor of Haspin and Dual-specificity Tyrosine-regulated Kinase 2 (DYRK2) with IC ₅₀ s of 10 nM and 48 nM, respectively ^[1] .
IC₅₀ & Target	IC ₅₀ : 10 nM (Haspin); 48 nM (DYRK2) ^[1]
In Vitro	LDN-192960 (10 μM) is selective and inhibits ten of the other kinases by ≥90%, with only five being potently inhibited (IC ₅₀ <1 μM), including CLK1 (IC ₅₀ =0.21 μM), DYRK1A (IC ₅₀ = 0.10 μM), DYRK2 (IC ₅₀ =2 nM), DYRK3 (IC ₅₀ =19 nM) and PIM1 (IC ₅₀ =0.72 μM) ^[1] .
